

Senior Bathroom Safety Program

Bathroom safety is a concern for everyone, but especially for the elderly, who are at greater risk for serious injuries.

However, falls & fractures are not an inevitable part of aging if preventative measures are taken, such as adapting the bathroom to maximize safety & reduce risks, while helping the individual maintain their independence.

The Office on Aging, through a grant funded by the Middlesex County Office of Aging & Disabled Services, coordinates the professional installation of grab bars in the homes of eligible borough senior citizens, free of charge, on a 1st come, 1st served basis.

Participation is strictly voluntary & specific criteria must be met; contact the Office on Aging at (732) 257-2340 for more information.

South River Office On Aging

55 Reid Street, South River, NJ 08882
